- **Chemically Inert**
- **Virtually Zero Extractables**
- **Low Deformation Under Load**
- **Low Stress Relaxation**
- **Unmatched Steam and Caustic Resistance**
- **Perfect for SIP and CIP Applications**
- **Gas-tight sealing in ultra-pure environments**

Tyfluor 1000 is a chemically modified version of PTFE that provides much improved sealing capabilities while maintaining the property characteristics consistent with virgin PTFE material. Tyfluor's chemical inertness and extremely low level extractables combined with its superior stress relaxation and low deformation characteristics make it an ideal gasket and seal material for the pharmaceutical and biotechnology industries.

Clamp gaskets made from Tyfluor 1000 provide a much higher level of performance when compared to conventional PTFE products used in pharmaceutical and hygienic applications. They also perform better in applications with frequent thermal cycling or vibration. Tyfluor gaskets prevent intrusion into pipe fittings and do not create issues related to flow restrictions or cross contamination.

The broad capabilities of Tyfluor gaskets allows for gasket inventory reduction.

Tyfluor 1000 is FDA and USP Class VI (toxicity) compliant.

TYPICAL PROPERTIES		
Physical Properties	**ASTM Method**	**Typical Value**
Color		White
Specific Gravity	D1457	2.18
Elongation @ Break %	D1457	450
Tensile Strength @ Break, psi	D1457	5000
Permanent Deformation Under 20000 psi @ 78ºF/26ºC (%)	D621	3.2
Service Temperature Range		-200ºF to 500ºF (-128ºC to 260ºC)
